European Construction Business Research And Forecasting Group

www.euroconstruct.org

EUROCONSTRUCT® is a registered trademark.

EUROCONSTRUCT was set up in 1974 by specialised research organisations from Belgium, France, Germany, Italy, the Netherlands and United Kingdom as a study group for construction analysis and forecasting. It has since expanded from the core group to include almost all Western European countries, as well as 4 Central Eastern European countries. At present, EUROCONSTRUCT has member institutes in 19 European countries.

EUROCONSTRUCT's objective is to provide decision makers in the construction sector and other to the construction industry related markets with information, analyses and forecasts to enable them to plan their business better and more effectively. Furthermore, the activities of the EUROCONSTRUCT network addresses to official institutions like ministries or agencies and to national and international associations.

Construction markets are regional or even local. It is, therefore, a great advantage that the analyses and forecasts for these markets are prepared within the EUROCONSTRUCT network by competent national institutes for their respective home markets.

EUROCONSTRUCT's research and advice focuses on:

- Short and medium-term macro-economic forecasts and construction trends in Europe;
- Analyses of structural changes, business strategies and competition in the construction industry;
- Market studies for industrial goods and services used by the building and infrastructure sectors.
- EUROCONSTRUCT's research and forecasts are designed to meet the needs of many types of business including:
 - Construction contractors and developers; housing associations;
 - Manufacturers and traders supplying construction materials, products, equipment and machines; architects and other construction professionals;

- Insurances, banks, financial and credit institutions; fund managers and other investors; government departments and national agencies; industry associations;
- The Commission of the European Community and other European organisations.

Each country member of EUROCONSTRUCT has the project management resources to offer their customers turnkey studies of pan-European scope.

They can guarantee:

- Specific know-how and experience in database research and consulting;
- A consistent multinational approach;
- Expertise in project co-ordination and quality control;
- Reports in the languages of the customer's choice.
- Twice a year, EUROCONSTRUCT organises an international conference on:
 - Forecasts for the main market segments (housing, non-residential construction, infrastructure and civil engineering, all sub-sectors with a breakdown in new work and renovation/modernisation activities) in the EUROCONSTRUCT member countries;
 - A special issue selected for its impact on the construction industry (e.g. demographics, privatisation, lifestyles, technological change, internationalisation of strategies, changes in the demand and supply structure).

Recent and forthcoming conference venues:

- Winter 2015 Budapest (Hungary)
- Summer 2016 Dublin (Ireland)
- Winter 2016 Barcelona (Spain)
- **Summer 2017 Amsterdam (Netherlands)**
- Winter 2017 Munich (Germany)
- Summer 2018 Helsinki (Finland)

In addition, EUROCONSTRUCT offers special studies for selected national and international clients based on well-founded knowledge of databases, methods, correlations and measures.

For details, please contact the EUROCONSTRUCT partner institute in your country.

83rd EUROCONSTRUCT Conference ○ 8–9 June 2017, Amsterdam, Netherlands

The EUROCONSTRUCT Country Report

There are 19 country chapters, each written by sector specialists in the local partner organisation (list of partners: p. 3)

Basic structure of all 19 country chapters:

1. Summary and conclusions
2. Macro-economic outlook
3. Housing market
 - i. New housing
 - ii. Housing renovation
4. Non-residential market *)
5. Civil engineering market *)

Appendix: Definitions

Table 1: Main demographic and economic indicators

Table 2: Construction by type

Table 3: Residential construction

Table 4a: New non-residential construction (public and private)

Table 4b: Total civil engineering

Table 5: Gross domestic product

NOTE: The layout of the 6 standard tables in the country chapters can be seen in the next pages

*) Sectoral split of non-residential and civil engineering are as in Table 4a & Table 4b, respectively, although not all sub-sectors may be discussed in the text in each country chapter, depending on the relevance of the sub-sector in the present development in the particular country.
